

Container Queries Prolyfill

This is a prolyfill for a special version of container queries (aka element queries). You can read more about the idea and how they work internally in this article.

Demo

A quick demo of the container queries in action can be found here: https://ausi.github.io/cq-prolyfill/demo/

With this prolyfill you can use container queries in your CSS in the following form:

For more information take a look at the usage documentation.

Documentation

Read the documentation to see how you can install and use this script on your next project.

Browser Support

- Firefox 36+
- Opera 12.16+
- Chrome 40+
- Internet Explorer 9+
- Edge
- Safari 7+
- Yandex 14+
- iOS 7+
- Android 4+
- Windows Phone 8.1+

Thanks to BrowserStack for sponsoring automated cross browser testing for this project.

Contribute

- Create a new issue on GitHub if you have a question, a suggestion or found a bug.
- Talk about it on IRC: Join #cq-prolyfill on Freenode or connect with the browser.
- Spread the word about this project.
- Support this project on Patreon.
